National Jewish Hospital – <http://www.nationaljewish.org>

Being cared for at National Jewish Health is a unique health care experience. Patients come from around the world to seek our expertise and receive the highest quality personalized attention and care. We believe in offering more than a brief 15-minute patient encounter or just writing a few prescriptions. We provide the comprehensive education and care that our patients need. We also integrate our research and clinical efforts at the point of the patient, so that patients have access to the latest medical advances and great discoveries made in not only our labs but also others around the world. It is the philosophy of National Jewish Health to take these discoveries and integrate them into our programs to deliver the very best in preventive and personalized medicine. As a nonprofit institution since 1899, National Jewish Health continues to provide substantial amounts of charity care, which is generously supported by donors from around the world. Since the first patient entered our doors more than a century ago, we have expanded our areas of expertise and developed many unique programs that set us apart from other institutions. We operate a kindergarten through eighth-grade day school for children who are challenged with chronic illness. We also have nationally renowned smoking cessation and weight management programs. These programs have assisted hundreds of thousands of people via the Internet and phone, addressing the two leading causes of behavior-associated, preventable death in the United States-tobacco use and obesity. Our dedicated faculty and staff continue to develop other new and unique programs that address total health as part of our commitment to move from reactive to proactive medicine. This commitment by the faculty and staff at National Jewish Health has helped us earn recognition as the leading respiratory hospital in the nation. We will continue to meet and exceed your expectations in all areas of the care we deliver.

SCL Health - <http://www.sclhealthsystem.org/>

SCL Health is a faith-based, nonprofit healthcare organization dedicated to improving the health of the people and communities we serve, especially those who are poor and vulnerable. Catholic Health Initiatives – <http://www.catholichealthinit.org>

Catholic Health Initiatives, a nonprofit, faith-based health system formed in 1996 through the consolidation of four Catholic health systems, expresses its mission each day by creating and nurturing healthy communities in the hundreds of sites across the nation where we provide care. One of the nation's largest nonprofit health systems, Englewood, Colo.-based CHI operates in 18 states and comprises 99 hospitals, including two academic health centers, major teaching hospitals and 29 critical-access facilities; community health-services organizations; accredited nursing colleges; home-health agencies; living communities; and other facilities and services that span the inpatient and outpatient continuum of care. In the fiscal year 2017, CHI provided more than \$1.2 billion in financial assistance and community benefit for programs and services for the poor, free clinics, education and research. Financial assistance and community benefit totaled approximately \$2.1 billion with the inclusion of the unpaid costs of Medicare. The health system, which generated operating revenues of \$15.5 billion in the fiscal year 2017, has total assets of approximately \$22 billion.

CereScan – <http://www.cerescan.com>

At CereScan, our mission is to help provide hope and solutions for those suffering from brain injuries or brain disorders. We use functional brain imaging and advanced software to make invisible illnesses visible, allowing patients to receive a more accurate diagnosis and better treatment. Since opening our doors in 2008, CereScan's superior process, combined with our warm, patient-centered focus of care, enables us to provide patients and professionals with the highest level of neuroimaging in the country. Our success in helping our patients find answers is what attracts people from all walks of life, and from all over the world, to CereScan. Unlike MRI and CT scans, which take structural images of the brain, CereScan's technology is able to take accurate pictures of the functioning areas of the brain. When the brain is scanned, blood flow levels are mapped within the brain to pinpoint where blood flow is normal and where it isn't. Based on the signature patterns of brain-based disorders, a diagnosis can be more accurately identified. CereScan, based in Littleton, Colorado, with affiliate clinics in Chicago, Dallas, Houston, New Orleans, and Naples, Florida is the nation's leader in providing statistically measured brain diagnostics based on a new generation of imaging software,
